Summer, 1969

HFH and U-M to Affiliate

An event of far-reaching significance took place last March 3 when the Board of Trustees of Henry Ford Hospital and the Regents of the University of Michigan signed a memorandum of understanding. The two institutions have agreed to affiliate for the purpose of expanding medical education in Michigan.

Details of the affiliation are yet to be worked out—and may take some time—since they involve development of a curriculum of clinical instruction and experience, appointment and assignment of faculty, housing and many other details.

In making the joint announcement, both Dr. William N. Hubbard, dean of the U-M medical school, and Dr. Robin C. Buerki, executive director of the hospital, said the affiliation does not alter the role or responsibility of either institution. The hospital will remain responsible for care of its patients and the university for education of its students.

The resources and facilities of one affiliate will be available to the other so that research findings, clinical experience and teaching programs will be mutually beneficial. It is expected that a number of HFH staff doctors will receive appointments to the medical school faculty. The hospital's present postgraduate education programs will be continued, but joint programs may be developed.

The venture brings together two soundly established institutions with closely parallel ideals and records of accomplishment. Both HFH and UM's University Hospital have been dedicated to excellent patient care under a closed staff, non-profit, self-supporting policy, combined with postgraduate specialty training of interns and residents, as well as research.

By providing instruction and clinical experience for undergraduate students, HFH will help the University to expand its medical school enrollment from the present 205 in each of four classes ultimately to 300 members per class. Currently, HFH offers 333 internships and residencies; U-M is approved for 494 in a training program.

HFH to Train Nurse Clinicians

An HEW grant of $439,698 has been approved for Wayne State University and Henry Ford Hospital to fund a Master's degree program for health nurse clinicians.

Co-directors of the five-year project are Dr. Clarence E. Rupe, of HFH Medical Clinic 4, and Mrs. Dawn Zagornik, of the WSU College of Nursing.

The program provides that graduate nursing students will receive their clinical experience and some training courses at HFH.

The research project will investigate whether health nurse clinicians can fill the gap between health care needs met by physicians and those met by nurses. It will seek to return the nurse to care of the patient as an active participant in the physician-nurse-patient triad.

The project is divided into three parts: curriculum-educational; development of new employee roles for health nurse clinicians; and evaluation of the total project, including recommendations for changes.

Approximately 10 students will be enrolled in the first two-year program when it begins in September.

Dr. William Rush, HFH alumnus and present director of medical education at St. John Hospital in Detroit was the subject of an article in Michigan Medicine in April. Dr. Rush was the first American doctor to volunteer for service in the Children's Medical Relief International, Inc. The organization's purpose is to establish surgical and medical treatment and training centers in developing countries, such as Vietnam.

Continued on back page
The new intern and resident staff for the year beginning July 1, 1969 has been announced at Henry Ford Hospital. Interns and their medical schools are as follows:

Vanitha Appadorai, Christian Medical College (India); Dennis Assenmacher, Univ. of Michigan (Ann Arbor); Emilio Chu, Univ. of Santo Tomas (Philippines); Carlo A. Dall’olmo, Wayne State Univ. (Detroit); Moises Elterman, Facultad Medicina (Mexico); Zachary J. Endress, Wayne State Univ.; Hossein Faize, Univ. of Tehran (Iran); Arnold Charles Fellman, Univ. of Nebraska (Omaha); Howard Zelig Finkel, Hahnemann Medical College (Philadelphia); Thomas Lee Fisher, Univ. of Kansas (Lawrence); Heshmatollah Foroohar, Univ. of Tehran; William James Foster, Univ. of Michigan; Ivars Gailans, Univ. of Wisconsin (Madison); Jose Galvez, Univ. of Peru (Lima); Barth Armand Green, Univ. of Indiana (Indianapolis); John C. Hughes, Wayne State Univ.;

David Colvin Leach, Univ. of Rochester (New York); Iraq Maany, Univ. of Tehran; Thomas D. Magnell, Wayne State Univ.; David B. McConnell, Jefferson Medical College (Philadelphia); William H. Michaels, Northwestern Univ. (Chicago); Isaac J. Powell, Univ. of Indiana; Jan Rodger Radke, Univ. of Wisconsin; Helen M. Roppolo, Univ. of Michigan; Frederick James Sawaya, Univ. of Michigan; Robert J. Scheuerell, Marquette Univ. (Milwaukee, Wis.); Harry Daniel Schlosser, Univ. of Michigan; Helen J. Scoblic, Marquette Univ.; Richard W. Siders, Wayne State Univ.; Stephen Shell, Ohio State Univ. (Columbus); James Parry Wise, Univ. of Michigan; and Thomas Bell Woodworth, Univ. of Michigan.

Residents assigned to various departments and divisions and their medical schools are as follows:

Medical Residents, first year: Cesar A. Conde, San Marcos Univ. (Peru); Cosme Cruz, National Univ. of Mexico (Mexico City); Paul Donohue, Univ. of Michigan; Consuelo Gomez, National Univ. (Colombia); Celse E. Gomez-Sanchez, Univ. of San Marcos (Peru);

1969 INTERNS AND RESIDENTS

Paul A. Kvale, Medical College of Virginia (Richmond); Armando Montero, National Univ. of Mexico; Zarina Muzaffar, King Edward Medical College (Pakistan); Guillermo Rubio, National Univ. of Mexico; Silverio M. Santiago, Jr., Univ. of the Philippines (Manila); Mohammad J. Tabae-Zadeh, Pahlavi Univ. (Iran); Roberto Vargas, McGill Univ. (Montreal); and Samir Yehia, French Faculty of Medicine (Lebanon).

First year medical residents arriving after July 1 are: Donald G. Pica, Univ. of Michigan—October 1; Arthur T. Scherer, Ohio State Univ. (Columbus)—September 1; Nabil T. Tawile, French Faculty of Medicine—August 1; and Martin C. Zonca, Wayne State Univ.—August 15.

Medical Residents, second year: Vidal Borromeo, Jr., Univ. of the Philippines; Faranak Foroozanfar, Univ. of Tehran (Iran); Stephen A. Levy, Wayne State Univ.; Michael F. Macken, Wayne State Univ.; Mark Alan Prober, Univ. of Manitoba (Winnipeg); Sheldon S. Stoffer, Wayne State Univ.; and James Umphrey, Wayne State Univ.

Cardiology: Hahn J. Lee, Seoul National Univ. (Korea).

Dermatology: Thomas A. Baker, Wayne State Univ.; Stuart W. Brust, Univ. of Michigan; Theodore A. P. Golden, Univ. of Michigan; Robert G. Lee, Univ. of Michigan; and Harvey G. Shapero, Univ. of Toronto (Ontario).

Gastroenterology: Victor L. Lawoyin, Albany Medical College (New York); and Ahmad Nebatchi, Univ. of Tehran.

Gynecology and Obstetrics: Paz J. Quezada, Univ. of the Philippines.

Hematology (Fellows): Kenneth Bergsman, Ohio State Univ. and Antony G. Papayannis, Univ. of Thessaloniki (Greece).

Infectious Diseases: Beinvenido G. Gaitman, Wayne State Univ.

Oncology (Fellow): James R. Borst, Wayne State Univ. (Third year resident—coming September 1).

Ophthalmology: Hal D. Balyeat, Univ. of Oklahoma (Oklahoma City); Richard C. Mertz, Jr., Univ. of Michigan; and Kenneth B. Welsh, Univ. of Cincinnati (Ohio).
Otolaryngology: Nelson S. Keeler, Univ. of Michigan.

Pathology: Marino G. Ong, Gебу Institute of Technology (Philippines); Wolfgang H. Haese, Univ. of Hamburg (Germany); Mamdouha Ahdab Barouda, French Faculty of Medicine (Lebanon); and Marvin J. E. Oswel, Univ. of Western Ontario (London). Coming after July 1 are Shan-Shan Huang, Kaohsiung Medical College (Formosa)—September 1, and Maria Vida V. Sinson, Univ. of St. Thomas (Philippines)—arriving on August 1.

Pediatrics: Maya T. Chugha, S. G. S. Medical College Bombay Univ. (India). Arriving after July 1 are: Hsin Lang Lin, National Taiwan Univ. (Formosa)—July 18; T. V. Lloyd, Jefferson Medical College (Philadelphia)—end of July; and Hadi Safaf, Damascus Univ. (Syria)—August 1.

Surgical Department

The new residents in surgery and their medical schools are as shown:

General Surgery, first year: Joselito S. Almario, Univ. of St. Tomas (Philippines); Bhadrarasi Bansidhar, Grant Medical College Bombay Univ. (India); Bicher Barouda, French Faculty of Medicine (Lebanon); Jose F. Font-Soto, Univ. of Mexico (Mexico City); Fernando Gomez, National Univ. (Colombia); James Haung, National Taiwan Univ. (Formosa); William E. Mosher III, Univ. of Michigan; Kamil Muzaffar, King Edward Medical College (Pakistan); Bireswar Patnaik, S. C. B. Medical College Utkal Univ. (India); Norman L. Pollak, Univ. of Michigan; Krishna K. Sawhney, Rajendra Medical College (India); Assisi Soares, Ghandhi Medical College Vikram Univ. (India); Julio Soares, Osmania Univ. (India); and Harold M. Stokes, Univ. of California (Los Angeles). Curran J. Smith, Univ. of Missouri (Columbia) will start October 1.

General Surgery, second year: Friedrich Dutka, Univ. of Vienna (Austria); Edward L. Humpert, Georgetown Univ. (Washington, D.C.); Andre F. Abou Jawde, French Faculty of Medicine (Lebanon); William P. McCabe, Cornell Univ. (New York); and Rafael Salas, National Univ. (Mexico).

Third year: Terry Alan Cromwell, Univ. of Cincinnati (Ohio).

Fifth year: William Francis Malanney, Univ. of Michigan.

Dentistry and Oral Surgery: Andrew S. Balta, Univ. of Pittsburgh School of Dentistry, and Cesar Sabates, Univ. of Missouri School of Dentistry.

Neurosurgery: Kenneth R. Mattheis, Creighton Univ. (Nebraska).

Orthopedic Surgery: Jerome Waiter, Wayne State Univ., and Thomas Foerster, Univ. of Illinois, arriving on September 1.

Thoracic Surgery, First year: Juergen P. Krauthammer, Univ. of Buenos Aires (Argentina), and Keisuke Sakai, Hokkaido Univ. (Japan). Second year: Nobuatsu Kouno, Keio Univ. (Japan).

Spring Symposium

A “Symposium on Tissue Rejection and Immunological Problems of Transplantation” was held at HFH on May 22 as the spring meeting of the Michigan Section of the Society for Experimental Biology and Medicine. Topics of papers included immunologic evaluation of the individual before and after renal transplantation, mechanism of hyperacute rejection of renal xenografts, progress in the preservation of organs for transplantation, and transplantation of the human heart (report of three cases). Participants were Drs. George A. Lopriorno, H. Hayashi, Dean A. LeSher, Clarence E. Rupe and Stanley Dienst, all of HFH; Drs. Eberhard F. Mammen and J. C. Rosenberg, of Wayne State; and Dr. Donald Kahn, of Univ. of Michigan.

Word has been received of the death last March of two nurses who served many years at HFH: Miss Ethel Moier, one of the first nurse anesthetists, died in Florida; and Miss Dorothy Van Vliet, member of the first graduating class of the HFH School of Nursing, died in California.
HFH and Harper Hospital Join To Aid Patient with Kidney Transplantation

Cooperation between two independent hospitals, combined with modern surgical techniques and new scientific equipment, have given a 42-year-old mother a transplanted kidney.

The woman is now recuperating at HFH where she had been undergoing dialysis the past year, awaiting a cadaver organ. She had a nephrectomy last February because of chronic glomerulonephritis. The donor kidney came from a 27-year-old man who died in Harper Hospital following a ruptured cerebral aneurysm.

Word of the possible availability of a kidney came in a phone call from Harper to HFH, two days before the donor's death. Harper had no ready recipient to match the donor's blood type A.

Following the donor's death, Dr. Stanley G. Dienst, attending surgeon at HFH, removed both kidneys at Harper and transported them to HFH using the recently-acquired portable organ preservation machine.

A surgical team led by Dr. Roger Smith prepared the recipient patient at HFH and, in less than two hours after the organ removal at Harper, the implantation was successfully completed and the transplanted kidney was functioning.

Others who cooperated in the HFH-Harper event were Dr. James Gallagher, attending physician for the donor, Dr. A. Waite Bohne and Dr. John Hageman of the HFH staff, Dr. Dean LeSher, physician in charge of the Artificial Kidney Unit, Miss Anne Rowland, R.N., nurse in charge of the Unit, assisted with transport of the organ and with the patient care; and Dr. Gerald Fine, Dept. of Laboratories, confirmed the histocompatibility tests.

Education Seminar Draws Physicians

Sponsored by the House Staff Association, a Resident Education Seminar brought a large delegation of visiting physicians to Henry Ford Hospital last May 17. Most were from Detroit and Ann Arbor area hospitals.

Featured speakers included Dr. Vernon Knight, professor and chairman of the Department of Microbiology and professor of medicine at Baylor University, Houston, Texas; and Dr. Lawrence Brettschneider, associate professor of surgery at the University of Colorado in Denver.

Dr. Knight spoke on “Hong Kong Influenza — Epidemiology, Vaccination and Treatment” and Dr. Brettschneider discussed “Clinical Organ Transplantation.” Dr. Knight also participated in a panel discussion on “Choice of an Antibiotic, Old or New,” and Dr. Brettschneider moderated a panel discussion on “Problems in Organ Transplantation.” The program also featured papers on a variety of subjects by HFH residents and guests from other institutions, including the Univ. of Michigan Medical Center, Wayne State Univ., and the Baltimore City Hospitals.

Residents Dr. Charles A. Hanson and Dr. Stuart J. Kingma were co-chairmen of the seminar. Dr. Charles H. Bedard is president of the House Staff Association.

Former research associate in the Department of Biochemistry, EBFI, Robert L. Ringler, Ph.D., has been named Deputy Director of the National Heart Institute, National Institute of Health, in Bethesda, Md. He served at HFH from 1957 to 1961 and since then has been with the NIH.

Dr. Ringler's main research interests are respiratory enzymes, electron transport, protein chemistry, and the purification and mechanism of action of enzymes and intermediary metabolism.

Dr. Brock Brush, chief of General Surgery Division I, has been reelected chairman of the board of the Michigan Cancer Foundation for another one-year term.

Among "oldtimers" retiring recently from Henry Ford Hospital were Art Whelpley, who spent 33 years in the Dental Lab (and who was familiar for his magician's hobby); and Louis Bennett, a 40-year employee in Patient Services.
