For Graduate Medical Education —
take another look at Detroit
and Henry Ford Hospital

Inquiries are invited about the opportunities resulting from a current
$300,000,000 development program which has already produced new research
laboratories and classrooms, a new apartment building for house officers and
students, plus expanded clinic facilities.

Training programs are offered in 26 specialties by a full time staff of 330 senior
physicians. Many hold clinical faculty appointments at the University of Michigan
Medical School, a major affiliate.

Over 3,000 outpatient visits daily, 1,073 hospital beds, and a diversified urban
population provide clinical experience. More than 100 weekly conferences and
seminars are scheduled for 335 house officers and third and fourth year
undergraduates.

Call or write for more information and descriptive catalog.

HENRY FORD HOSPITAL
Office of Educational Policies and Resources
2799 West Grand Boulevard, Detroit, Michigan 48202
1-313-876-1464

Detroit’s renaissance as a
city can also be seen at
Henry Ford Hospital. The
metamorphosis is demon­
strated in this side view of
the new 7-story Education
and Research Building
adjacent to the 17-story out­
patient clinic. The two
buildings in foreground are
all that remain of the original
hospital started in 1915 by
Henry Ford. The then
unique concept of a closed
staff group practice, com­
bining inpatient and outpa­
tient services with scientific
research and education, has
been proven by successful
growth.
Advice to Authors

Henry Ford Hospital Medical Journal

The Editorial Board of the Henry Ford Hospital Medical Journal welcomes papers for review and possible publication from any former or current staff member of the Henry Ford Hospital or the Edsel B. Ford Institute for Medical Research. The Journal provides a rapid means of publication of papers covering a broad spectrum of interests including case presentations, scientific experimental studies from either basic or clinical research science laboratories, preliminary communications, and papers philosophically oriented.

Style of writing should conform to good English usage and be clear, readable and optimally brief. Within these limitations individuality will not be discouraged. Certain conformities are essential for a good journal and the ones expected here are as follows:

Acknowledgements of grant support should be indicated in an initial footnote, and the departmental and divisional affiliations indicated at the same point.

Layout of the textual presentation and number of illustrations is left to the discretion of the author, within reasonable limits.

Dorland’s Medical Dictionary and Webster’s New Collegiate Dictionary are the standards used. Generally, the style book of the American Medical Association is followed, with titles as abbreviated by Index Medicus.

A summary/abstract, which is a 150-200 word statement of purpose and conclusions, should be furnished for use with the paper.

All tabulated material should be submitted camera-ready. Where illustrations cannot be used same size, desired “cropping” should be shown or reduction considered.

References should be in numerical rather than alphabetical sequence, according to their order of appearance in the text, and in the following style:

Responsibility for accuracy of references rests with the author.

Three copies of the manuscript are required, with the author keeping at least one more. One complete set of original illustrations must be submitted with the three copies of manuscript, and the author must have available at least one complete duplicate set of these illustrations. One submitted manuscript copy should be the original and the other two dry-copy (eg, Xerox). Dry copies of the illustrations should be included with the two similar copies of the manuscript. The editors are aware that the optimal quality of illustrations will be apparent only in the originals.

One hundred reprints will be made available without charge to the authors of each paper published in the Journal. Reasonable requests for additional reprints made at the time of acceptance of the paper for publication will be considered and honored if possible.

Suggestions about any of this advice which readers and authors think will serve to improve the Journal will be welcomed by the editors.
