IN MEMORIAM
Benson Ford
1919-1978

Henry Ford Hospital noted with sadness last summer the death of Benson Ford, who died on July 27, 1978, at the age of 59. He had served the Hospital as Chairman of its Board of Trustees since 1974.

Born in Detroit on July 20, 1919, Mr. Ford was the grandson of the Hospital’s founder, Henry Ford, and second son of the late Edsel and Eleanor Clay Ford. He was a vice president of Ford Motor Company and chairman of the company’s dealer policy board.

Mr. Ford was a member of the HFH Board for more than 30 years and president for 20 years. It was during his years of leadership that the Hospital’s Development Program resulted in the completion and occupation of the Fairlane and West Bloomfield outpatient centers (1975) and the HFH Apartment Building on the Detroit campus (1976).

His particular interest in the development of medical education and research programs at HFH was reflected in his leadership in the planning, funding, and construction of the Benson Ford Education and Research Center dedicated at the HFH location in October, 1977.

Mr. Benson Ford
