HENRY FORD HOSPITAL MEDICAL JOURNAL

The Henry Ford Hospital Medical Journal is published quarterly by the Henry Ford Hospital and is distributed to Henry Ford Hospital staff, alumni, and to medical centers and libraries in the United States and abroad. It is also sent, upon request, to physicians or medical students in their third and fourth years of medical school. Medical students should state the year of their graduation when requesting the Journal. Requests should be sent to the Scientific Publications Office, 2015 Education and Research Center, Henry Ford Hospital, 2799 W Grand Blvd, Detroit, MI 48202.

For changes of address, please enclose the old address label, give the complete new address, and allow six weeks for processing.

The Journal publishes the work of any current or former staff member of Henry Ford Hospital, alumni, and participants in academic and scientific activities, meetings, and symposia sponsored by Henry Ford Hospital. The Journal is listed by Index Medicus and is intended to be a broad scientific forum for all areas of interest: clinical, research, technical, administrative, patient care delivery. Complete instructions for authors wishing to submit a manuscript are printed at the back of the first issue of each year.

Back copies of the Journal are available from Xerox University Microfilms, 300 N Zeeb Rd, Ann Arbor, MI 48106, as 3.5 mm microfilms (Vols 1-20) or as 16 mm films (Vols 19-present).

FEATURE ARTICLES:**Papers from the Alumni**

Feature articles in this issue are related to Henry Ford Hospital alumni activities. The review of the regional acceleratory phenomenon by Harold Frost marks the return of the former chairman of the Department of Orthopaedic Surgery to Journal pages. The three papers on gastroenterology concerning the acquired double pylorus, colon trauma, and esophageal varices were presented at the 1982 Alumni Reunion last October. The papers on cancer by Charles Rogers and Angelos Kambouris, as well as Michael Paparella's review of otitis media, were also presented at that meeting. Finally, this group of papers includes the unusual case reported by the Drs. Sapala, surgeons who are well known to two generations of HFH staff.
