The Henry Ford Hospital Medical Journal is published quarterly by Henry Ford Hospital and is distributed to Henry Ford Hospital staff, alumni, and to medical centers, libraries, and physicians in the United States and abroad. It is also sent, upon request, to medical students in their third and fourth years of medical school. Medical students should state the year of their graduation when requesting the Journal. Requests should be sent to the Medical Journal Office, 411/413 New Center Pavilion, Henry Ford Hospital, 2921 W Grand Blvd, Detroit, MI 48202.

For changes of address, please enclose the old address label, give the complete new address, and allow six weeks for processing.

The Journal publishes the work of any current staff member or resident of Henry Ford Hospital, alumni, and participants in academic and scientific activities, meetings, and symposia sponsored by Henry Ford Hospital. The Journal is listed by Index Medicus and is intended to be a broad scientific forum for all areas of interest: clinical, research, technical, administrative, medical ethics, and patient care delivery. Complete instructions for authors wishing to submit a manuscript are printed at the back of the first issue of each year.

Back copies of the Journal are available from University Microfilms, 300 N Zeeb Rd, Ann Arbor, MI 48106, as 3.5 mm microfilms (Vols 1-20) or as 16 mm films (Vols 19-present).
Contents: Clinical Disorders of Bone and Mineral Metabolism

Preface
M. Kleerekoper
S.M. Krane

I. BOY FRAME, MD—IN MEMORIAM
Tribute to Boy Frame
J.T. Potts, Jr
Surface Specific Bone Remodeling in Health and Disease
A.M. Parfitt
Mechanical Usage, Bone Mass, Bone Fragility: A Brief Overview
H.M. Frost
Discussion

II. BONE REMODELING
Overview
A.M. Parfitt
Biochemical Markers of Bone Remodeling
R. Marcus
Discussion
Effects of Age, Sex, and Race on Bone Remodeling
R.R. Recker
R.P. Heaney
Discussion
In Vivo Hormonal Effects on Trabecular Bone Remodeling,
Osteoid Mineralization, and Skeletal Turnover
F. Melsen
L. Mosekilde
E.F. Eriksen
P. Charles
T. Steinicke
Discussion

III. ALLIED DISCIPLINES
Overview
S.M. Krane
Application of Molecular Genetics to Osteopenic Bone Disease
P. Tsipouras
D.W. Rowe
Discussion
Hematopoietic Growth Factors
G.D. Roodman
Discussion
Bone Induction
J.A. Glowacki
Discussion
Surgical Management of Patients with Skeletal Tumors
M.H. McGuire
Discussion

IV. CLINICAL CASE PRESENTATIONS
Overview
L.V. Avioli
H.G. Bone III

V. SPINAL OSTEOPOROSIS
Overview
C.H. Chesnut III
Osteoporosis: 1988 and Beyond
W.A. Peck
Discussion

Further Characterization of the Heterogeneity of the
Osteoporotic Syndromes
L.J. Melton III
B.L. Riggs
Discussion
Appropriate Use of Bone Densitometry
H.K. Genant
J.E. Block
P. Steiger
C.C. Glueck
B. Ettinger
S.T. Harris
Discussion
Developing Strong Bones: The Teenage Female
V. Matkovic
D. Dekanic
Discussion
Preserving Strong Bones: The Young Adult Female
B.L. Drinkwater
Discussion
Optimizing Bone Mass in the Perimenopause: Calcium
R.P. Heaney
Discussion
Optimizing Bone Mass in the Perimenopause: Estrogen
C. Christiansen
B.J. Riis
Discussion
Optimizing Bone Mass in the Perimenopause: Calcitonin
and Diphosphonates
C.H. Chesnut III
Discussion
Use of Vitamin D Metabolites in Osteoporosis
J.C. Gallagher
Discussion
Steroids and Osteoporosis: An Unsolvable Problem?
L.G. Raisz
Discussion

VI. METABOLIC BONE DISEASE AND THE HIP
Overview
R. Lindsay
Epidemiology of Hip Fractures and Falls
S.R. Cummings
M.C. Nevitt
Noninvasive Measurement of Bone Loss in the Femoral Neck
H.W. Wahner
The Relationship Between the Iliac Crest Bone Biopsy and Other
Skeletal Sites
D.W. Dempster
Stochastic Models of Femoral Bone Loss and Hip Fracture Risk
A. Horsman
L. Burkinshaw
Discussion
Femoral Fracture: The Role of Vitamin D
M. Peacock
L. Hordon
Vitamin D Nutrition and Metabolism in Aging and Osteoporosis
T.L. Clemens
Discussion
The Orthopaedist and Hip Fractures
J.M. Lane
C.N. Cornell
M. Bansal
S.B. Schwartz
R. Schneider

Medical Management of Osteoporosis of the Hip
M.E. Kraenzlin
E.E. Schulz
C.R. Libanati
L.A. Tudtud-Hans
M.R. Mariano-Menez
D. J. Baylink

Discussion

VII. PTH-RELATED DISORDERS
Overview
J.P. Bilezikian
T.J. Martin

Approaches to the Clonality of Human Tumors and Their Application to Parathyroid Adenomas
A. Arnold
H. M. Kronenberg

Physiology and Pathophysiology of Ca\(^{++}\)-Regulated PTH Release
E. M. Brown
C. J. Chen
M. S. Leboff

Multiple Endocrine Neoplasia Type I: Role of a Circulating Growth Factor in Parathyroid Cell Hyperplasia
M. L. Brandi
M. B. Zimering
S. J. Marx
D. DeGrange
P. Goldsmith
K. Sakaguchi
G. D. Aurbach

Discussion

G Proteins as Signal Transducers
M. A. Levine

Pseudohypoparathyroidism: Studies of the Pathogenesis of Parathyroid Hormone Resistance
D. Goltzman
J. A. Mitchell
G. N. Hendy

Discussion

Primary Hyperparathyroidism: The Surgically Cured Patient
S. Ljunghall
C. Joborn
M. Palmer
J. Rastad
G. Akerstrom

Primary Hyperparathyroidism in the 1980s
J. P. Bilezikian
S. J. Silverberg
E. Shane

Discussion

VIII. METABOLIC BONE DISEASE IN CHILDREN
Overview
M. P. Whyte

Osteopetrosis with Renal Tubular Acidosis and Cerebral Calcification: The Carbonic Anhydrase II Deficiency Syndrome
W. S. Sly

Discussion

Pediatric Forms of Hypophosphatasia
M. P. Whyte

Discussion

Williams Syndrome
R. W. Chesney

Discussion

IX. VITAMIN D IN HEALTH AND DISEASE
Overview
N. H. Bell

1,25-Dihydroxyvitamin D\(_3\) Receptor Structure and Function
M. R. Haussler

Hereditary Resistance to 1,25-Dihydroxyvitamin D: Pathophysiology, Diagnosis, and Treatment
U. A. Liberman
S. J. Marx

Discussion

X. CLINICAL DISORDERS OF BONE AND MINERAL METABOLISM
Overview
G. Mundy

Pathophysiology of Hypercalcaemia
J. A. Kanis
E. McCloskey
N. Handy
D. O’Doherty
D. Bickerstaff

Discussion

Hypercalcaemia—Solid Tumors
T. J. Martin

Discussion

Mechanisms of Hypercalcaemia in Hematologic Malignancies
G. R. Mundy

Discussion
XI. THERAPEUTIC ADVANCES IN METABOLIC BONE DISEASE

Overview
- H. Heath III

Biphosphonate Treatment of Severe Hypercalcemia
- J.J. Body

Potential Use of Gallium Nitrate and WR-2721 in the Treatment of Hypercalcemia and Hyperparathyroidism
- J.-P. Bonjour
- R. Rizzoli
- J. Caverzasio

Discussion
- Therapy of Aluminum Related Bone Disease
  - H.H. Malluche
  - M.-C. Faugere

Discussion
- The Role of Sodium Fluoride in the Treatment of Osteoporosis
  - B.L. Riggs
  - S.F. Hodgson
  - R. Eastell

Discussion
- New Methods of Administration of Estrogens
  - R. Lindsay

Discussion
- Parathyroid Peptide (hPTH 1-34) in the Treatment of Osteoporosis
  - J. Reeve
  - U.M. Davies
  - M. Arlot
  - J.N. Bradbeer
  - J.R. Green
  - R. Hesp
  - C. Edouard
  - P. Hulme
  - R.D. Podbesek
  - D. Katz
  - J.M. Zanelli
  - P.J. Meunier

Discussion

AUTHOR AND SUBJECT INDEX
Clinical Disorders of Bone and Mineral Metabolism
Proceedings of the Laurence and Dorothy Fallis International Symposium.
Detroit, Michigan May 8-13, 1988
Edited by Michael Kleerekoper and Stephen Krane

The purpose of this symposium was to update clinicians on the new advances in the basic science area of disturbances in bone and mineral metabolism and their relevant clinical applications. Each section is introduced with an overview and followed by highly selected manuscripts pertinent to that session. An edited transcript of the discussion, which adds more useful information to the text, is added at the end of each presentation. The symposium also paid tribute to the late Boy Frame who was the driving force behind the emerging clinical discipline of metabolic bone disease and disorders of mineral metabolism.

Contents

I Boy Frame, M.D.—In Memoriam
II Bone Remodeling
III Allied Disciplines
IV Clinical Case Presentations
V Spinal Osteoporosis
VI Metabolic Bone Disease and the Hip
VII PTH-Related Disorders
VIII Metabolic Bone Disease in Children
IX Vitamin D in Health and Disease
X Clinical Disorders of Bone and Mineral Metabolism
XI Therapeutic Advances in Metabolic Bone Disease

Clinical Disorders of Bone and Mineral Metabolism
1988 International Symposium

VIDEOTAPE ORDER FORM

Videotapes of the following sessions and workshops are available in ½” (VHS) format. Place a checkmark next to the videotape(s) ordered, complete the return mailing address, enclose personal check or money order payable to Henry Ford Hospital, and mail to Curt Patterson, Medical Education, Henry Ford Hospital, 2799 W Grand Blvd, Detroit, MI, 48202. Please allow 8-10 weeks for delivery. For further information call (313) 876-3072.

_____ Session I: Boy Frame, MD: In Memoriam ($20.00)
_____ Session II: Bone Remodeling ($20.00)
_____ Session III: Allied Disciplines ($40.00)
_____ Session IV: Clinical Case Presentations ($20.00)
_____ Session V: Spinal Osteoporosis ($40.00)
_____ Session VI: Metabolic Bone Disease and the Hip ($45.00)
_____ Workshop I: Clinical Trials in Osteoporosis ($20.00)
_____ Workshop II: Radiologic Aspects of Metabolic Bone ($20.00)
_____ Session VII: PTH-Related Disorders ($45.00)
_____ Session VIII: Metabolic Bone Disease in Children ($40.00)
_____ Session IX: Vitamin D in Health and Disease ($40.00)
_____ Workshop III: Dual-Photon Absorptiometry ($20.00)
_____ Workshop IV: Skeletal Histology ($20.00)
_____ Session X: Clinical Disorders of Bone and Mineral Metabolism ($40.00)
_____ Session XI: Therapeutic Advances in Metabolic Bone Disease ($30.00)
